WRKZY

PUBLIC INVESTMENT TEASER

An AI workforce. For every business.

WRKZY is building an AI workforce for business. We start by connecting customer conversations, records and follow-through in one workspace. Today, AI assists with summaries, drafts and recommendations. Our next stage is governed AI employees that complete bounded work, with people setting goals, permissions and approvals.

THE INVESTMENT THESIS

Start with real work

Customer operations provides repeatable enquiries, quote follow-ups and handoffs where completion can be inspected.

Build toward delegation

Connect business context, permitted actions, approvals and recorded outcomes before expanding autonomous responsibility.

Earn a wider workforce

Expand to more roles and markets as customer value, reliability, retention and economics are demonstrated.

SELECTED-MARKET MODEL

$53.3B

TAM / Modeled annual opportunity

$8B

Potential SAM / Expansion fit

$101M

SOM / Year-five, year-end cohorts

Scale case: $6K/account/year assumption
US/UK/CA/AU - not company guidance

TODAY AND DIRECTION

Today, WRKZY can summarize, draft, recommend, and run configured workflows. Autonomous multi-step agents are part of the product direction and will launch only with scoped permissions, approvals, and complete audit history.

THE NEXT DILIGENCE CONVERSATION

Private diligence: verified customer and financial cohorts, founder/team credentials, agent evaluations, a milestone budget, and investment-entity/IP documentation.

Discuss the thesis and diligence evidence
